

This experiment showed that when you pierce a bag a water with a pencil a seal is formed and the water doesn't come out. How amazing!

We set up an experiment which involved growing cress in different conditions... in the dark, the fridge, with and without water, in the sun and on the radiator. We found out that plants grow best in the light, with water, at the correct temperature and when they are looked after.

In Year 2 this month, we have enjoyed learning from stories such as 'Little Red Riding Hood' and 'The Great Fairy Tale Disaster'.

We loved Science week and the visit from the Rainbow Theatre company!

This experiment used oil and water.

We put some dye into water and watched how the flowers changed colour.

Little Red Riding Hood...

We role played the Three Little Pigs.

We all loved acting and joining in!

The Three Billy Goats Gruff...

Goldilocks and the Three Bears...
