

In maths this month we have been learning to measure different things. We have measured length, height, mass and temperature.

In Year 2 this month, we have enjoyed learning all about **DRAGONS!**

In Literacy this month we have been very busy! We have written our own non-fiction fact file all about real dragons, we have written letters, poems and character descriptions linked to our core texts. We have been focusing on using expanded noun phrases, possessive apostrophes and conjunctions to extend our writing.

This month we have had some very special visitors. We have had the fire service come in to talk to us all about being safe and they showed us around the fire engine. We even got to watch them respond to a real call!

We have done lots of lovely artwork relating to dragons. We started by sketching dragon eyes, looking closely at the detail of the scales and shape of the pupil. We then created our own clay dragon eye and painted it. Finally we have spent time making our own mod-rock dragon egg and mosaicked it just like Antoni Gaudi.
